MEDIA INFORMATION

EMS Group denies Keystone-SDA statements on the automotive market

The EMS Group, active worldwide in the business areas of High Performance Polymers and Specialty Chemicals and with its companies combined in the EMS-CHEMIE HOLDING AG, states as follows:

The news agency Keystone-SDA reported today that the global automotive industry is suffering from persistent weakness and that vehicle production is expected to develop flatly in 2026 as well. Production cuts also of electric vehicles were reported.

The EMS Group notes that global vehicle production grew by +3.2% in 2025, and that growth of +1.8% is forecasted for 2026. Electric vehicle production worldwide increased by 28% in 2025. (Source: GlobalData)

The EMS Group will report on its own business figures this coming Friday, February 6, 2026 at the regular annual media conference.
